RESOLUTION #23-299  
TO ADVERTISE FOR  
SIX MONTH BIDS

The Board of County Commissioners, Pittsburg County, met in regular session on Monday, May 22, 2023.

WHEREAS, Pittsburg County wishes to advertise for the following materials for six-month bids:

CRUSHED STONE  
ASPHALT SAND  
MANUFACTURED SAND  
ROAD OILS  
NEW & USED STEEL  
USED STEEL PIPE  
PLASTIC PIPE  
GRADER BLADES  
TIRES (NEW, MAJOR BRANDS ONLY)  
TIRE RECAPS WITH CORE  
TIRE SERVICES  
HAULING

A bid package containing complete specifications and an "Invitation to Bid" with an affidavit of non-collusion may be picked up at the County Clerk's Office, Pittsburg County Courthouse, 115 E. Carl Albert Parkway, Room 103, McAlester, OK 74501. All bids must state price of the aforesaid materials and said materials must be delivered in quantities ordered when and as needed by the Board of County Commissioners, within a six-month period, beginning July 1, 2023 and ending December 31, 2023. Each competitive bid submitted to the county must be accompanied with an affidavit for filing with competitive bid form, as required by 19 O.S. § 1501(3). No bid will be considered unless submitted on this form with affidavit completed and notarized. Place you bids in an envelope and mark it "Six Month Bids".

Sealed bids will be received by the Pittsburg County Clerk until 4:00 p.m. Friday, June 9, 2023. Bids received after 4:00 p.m. on Friday, June 9, 2023 WILL NOT BE OPENED. Bids will be opened on Monday, June 12, 2023 at 10:00 a.m. in the Board of County Commissioners Conference Room, Pittsburg County Courthouse, 115 E. Carl Albert Pkwy, McAlester, OK 74501. Contract will be awarded to the lowest or best bidder. The Board of County Commissioners, Pittsburg County, reserves the right to reject any and all bids and re-advertise.

PITTSBURG COUNTY, OKLAHOMA

ATTEST:

CHAIRMAN

VICE-CHAIRMAN

MEMBER

COUNTY CLERK

RESOLUTION  
23-300

The Board of County Commissioners, Pittsburg County met in regular session on Monday, May 22, 2023.

WHEREAS, the following individuals wish to make a donation to the Pittsburg County Animal Shelter Donation Account (1235-1-8020-2202)

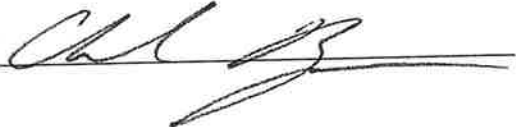

Emerson Elementary School                      \$664.00

WHEREAS, the Board of County Commissioners accept this donation on behalf of the Pittsburg County Animal Shelter, to be deposited into the Pittsburg County Animal Shelter's Donation account (1235-1-8020-2202), to be used for the items that cannot be purchased through the Maintenance & Operations accounts.

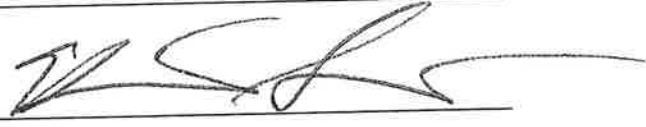

THEREFORE, BE IT RESOLVED, the Board of County Commissioners, Pittsburg County, do hereby approve this donation, to be deposited into the Pittsburg County Animal Shelter's Donation Account.

# LABORATORY REPORT

Date Prepared 4/6/23

Title	Evaluation of Roof Cores – Pittsburg County Courthouse
Lab Book	Smith 14
Page No(s)	71

## Abstract

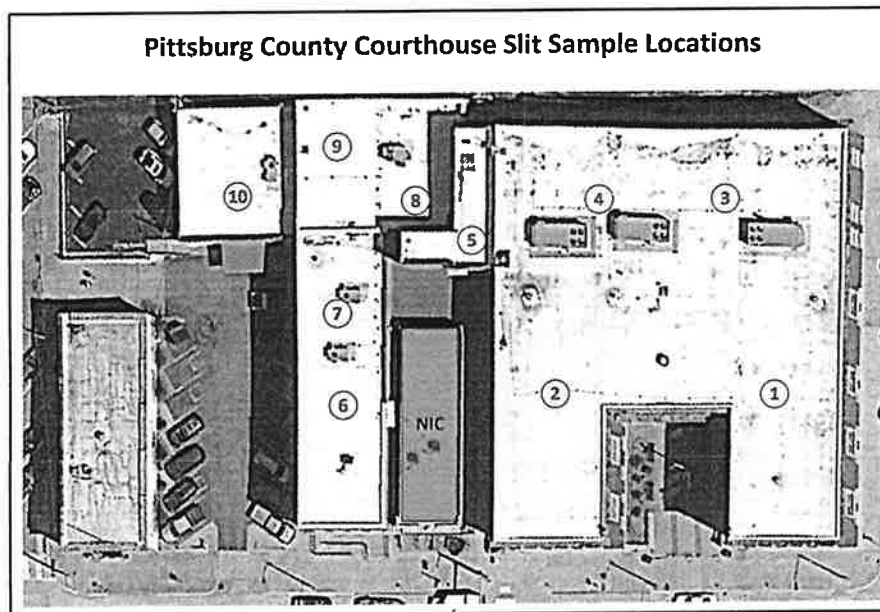

An evaluation of roof cuts from Pittsburg County Courthouse was conducted to determine if the proper coverage rate of LiquiTec was applied.

## Procedure

LiquiTec's application guide specifies that over single ply, a system of 3 gal/sq of a base layer of LiquiTec followed by an embedded polyester scrim reinforcement, topped with 2 gal/sq of LiquiTec will be applied. In mils, an "ideal" LiquiTec system would have a top coat thickness of 32 mils before coming to the reinforcement and a total thickness of 80 mils.

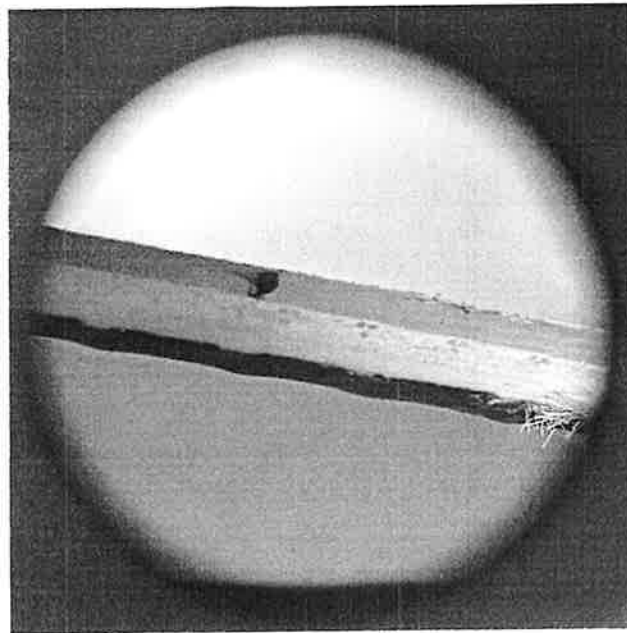

Ten cores coming from various sections of Pittsburg County Courthouse were cut from the locations shown in Image 1

*Image 1. Location of Core Cuts for Thickness Evaluation.*

These were submitted to the laboratory in the form of 2" diameter specimens with the request to test thickness of LiquiTec. Each was carefully cut in half with a fresh utility blade. Along one cut edge, arbitrarily chosen from the two pieces, five equally spaced tick marks were made so that the profile looked like the example shown in Image 2.

Image 2. NOT THE SAMPLE -View through comparator of a typical cut profile showing the small black reference mark.

A hand held comparator with attached mil thickness scale was used to determine the thickness of the top layer, defined as the top of the coating to the top of the reinforcement, and also the total thickness of the entire coating system. Five thickness measurements were taken, one at each tick mark. The average of those measurements were calculated to determine average top coat and total thickness, which were then compared to the ideal top coat and total thickness. The data will be shown in the next section.

### Results

Table 1 shows the average top coat and total thickness of each core relative to the ideal thickness for both with a +/- 10% variance.

Table 1. Tabulation of average thicknesses of each core.

	<b>Top Coat Thickness</b>		<b>Total Thickness</b>	
<b>Core 1</b>	13	29 – 35 mils	36	73 – 88 mils
<b>Core 2</b>	11		28	
<b>Core 3</b>	20		47	
<b>Core 4</b>	10		21	
<b>Core 5</b>	10		43	
<b>Core 6</b>	12		27	
<b>Core 7</b>	15		34	
<b>Core 8</b>	52		76	
<b>Core 9</b>	17		35	
<b>Core 10</b>	8		19	

## **Conclusions**

The data conclusively shows that only one core (Core 8) had sufficient total coverage and more than adequate top coat coverage above the reinforcement. The remaining nine cores fell short by as much as 76% (Core 10) of the required top coat and total thickness. In some instances, the scrim could be clearly seen telegraphing its pattern through the top coat, indicating inadequate coverage.

# Pittsburg County Courthouse Re-Application Guide

## RE: Pittsburgh County Courthouse - LiquiTec Restoration Inspection/Specification Review

Based on my inspection of the above referenced project last week and Garland lab evaluation of ten roof cores taken from the LiquiTec roof system restoration at the above referenced facility, the following is the scope of work to remediate and meet the specification requirements for warranty approval:

- Remove wet insulation as identified within the project Moisture Scan report and replace
- Cut single ply membrane on three sides and remove wet insulation and replace with new like kind and identical thickness. Clean back of single ply membrane to remove debris/insulation. Adhere back of cleaned old membrane to new insulation ensuring a smooth well-adhered membrane application. Apply Garland Unibond ST tape around cut perimeter edges of single ply membrane. Apply LiquiTec over Unibond Tape at 3 gal./sq (approximately 50 wet mils) and tie-in to existing cleaned and acetone-wiped LiquiTec
- Repair delaminated and wrinkled single ply flashing membrane on parapet walls per sections 3.2.A.2 and 3.3.B, g & h of specification to ensure a smooth substrate
- Grind down areas with any wrinkled Grip Polyester reinforcement with a Zek wheel. Clean and three course over area with new LiquiTec and Grip Polyester Reinforcement <https://pantheonurfaceprep.com/product/abrasive-wheels-coating-removal-tec-abrasive-disk-zec-wheel/>
- Ensure all flashings receive a fully reinforced LiquiTec installation per specification
- Wall flashings were found to not receive reinforced LiquiTec per the specification
- Apply an additional 3.0 gal./sq.(approximately 50 wet mils) of LiquiTec to the field to account for application below the specified coverage rate of 5 gal./sq. total.
- The average thickness of the ten core samples was 2.31 gal./sq. or 37 mils, which is less than half of the 5 gal./sq. or 80 mils finished thickness specification requirement. Two roof core samples were as low as 19 and 21 mils total thickness, which equates to just over 1 gal./sq. In some areas, the Grip Polyester reinforcement is exposed which is indicative of lack of LiquiTec coverage.
- Power wash roof. Let dry and apply 100% acetone and immediately roll over the aged LiquiTec surface with a smooth roller to reactivate the surface prior to additional coating. Apply LiquiTec. Please let me know if you have any questions or concerns regarding the above scope of work to align with the specification requirements.

Thank you.

Best Regards,

Ed Buczek

FLOODPLAIN ADMINISTRATOR'S REVIEW

Upon review, I, Tawanna Cathey, a Floodplain Administrator for Pittsburg County, have determined that the above-referenced public service/pipeline crossing permit:

\_\_\_\_\_ Does  Does Not

fall within any floodplain.

Tawanna Cathey  
Signature, Pittsburg County Floodplain Administrator

(Administrator: Please attach a copy of the floodplain permit and receipt where permit was paid if road crossing is within a floodplain)

If granted, this permit is subject to the following conditions, requirements and covenants, to-wit, please initial that you have read each condition, requirement or covenant:

- Applicant/contractor is aware that all road crossing permits for PITTSBURG COUNTY shall require approval from the Pittsburg County Floodplain Administrator's Office and that all permits and fees owed to the Floodplain Administrator's Office will be paid in full before approval is given by the Board of County Commissioners. Initial: JF

- Application for road crossing must be submitted *no later than 5 days before a meeting* of the Board of County Commissioners with a check for the amount of permit made payable to the Pittsburg County Commissioners. The petitioner/contractor shall contact the County Commissioners Office at the completion of crossing for an onsite inspection. Initial: JF

3. The applicant must agree to hold Pittsburg County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of the facilities on, under, or over the County right-of-way. The petitioner/contractor will be responsible for any damage resulting from deviation of the plat.

Initial: JF

4. All crossings shall be bored on blacktop/asphalt roads. Cutting may be permitted on dirt roads, ditches, or other surfaces with approval from the Board of County Commissioners. Blasting is not permitted.

Initial: JF

5. In construction pipelines or utility routes that cross county highways or roads, NO DITCH, TRENCH, OR BORING, shall be done by the applicant/contractor until approved by the Board of County Commissioners. All ditching and trenching shall be completed to the County Commissioner's specifications. Applicants, contractors or owners shall maintain crossing. (Signs, grass, brush control, etc.)

Initial: JF

6. The petitioner/contractor shall furnish all flag men, lights, barricades, and warning signs meeting all laws and regulations, including those in the "Manual on Uniform Traffic Control Devices" appropriate for the construction project. The petitioner/contractor agrees to keep the road open to traffic unless approved by the Board of County Commissioners. At the conclusion of such work, the right-of-way must be in a presentable condition.

Initial: JF

7. When notified to do so by the Board of County Commissioners, the petitioner/contractor agrees at their expense to make all changes in the facility on County right-of-way.

Initial: JF

8. Relocation – Applicant, upon 30 days written notice, agrees to relocate utilities at their expense should it interfere with County construction and/or maintenance.

Initial: JF

9. Aerial facilities – Clearance above the traffic lanes of the road at all aerial pole line crossings shall comply with applicable safety codes and will not be less than 20 feet. All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times and free from weeds and brush within a 5-foot area of the installation. These facilities, when paralleling the roadway, shall be single pole construction and located within 3 feet of the fence line, if a fence exists. If no fence exists, the right-of-way shall be located by an Oklahoma Registered Land Surveyor at the petitioner's expense and a copy provided to the Board prior to construction. All crossings shall be as nearly perpendicular as possible. Facility shall not interfere with the natural flow of waters or ditch.

Initial: JF

10. Underground facilities – All shall be a minimum of 5 feet below the elevation of the center line of the road, but not less than 4 feet below the bottom of the ditch. Crossings shall be encased from right-of-way line to right-of-way line and be vented off the right-of-way lines. Concrete caps of 4' wide and 6" deep may be required from edge of road to fence line. Identification markers shall be installed at each right-of-way line directly above the facility. The markers must identify the owner's name, address and telephone

number, size of facility, and emergency contact number in black with a yellow background. Marker must be at least 130 sq. inches in area and erected at a height plainly visible from the road right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 4 feet below the ditch flow lines. Conduit placed beneath a roadway must be steel, HDPE, heavy-duty PVC, or fiberglass if it is designed to withstand roadway loading and is properly protected.

Steel pipelines crossing the right-of-way may be, upon approve of the Commissioner, installed without encasement if the carrier pipe material within the right-of-way is superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines crossing the county right-of-way shall be encased. Maintenance will be performed by a method that will not disturb the through lanes or interfere with traffic. All conduits shall be sufficient to withstand roadway loadings.

Initial: JF

11. All section corners and ¼ section corners shall be protected. No pipeline or utility line shall cross an intersection diagonally. No liens shall cross within 50 feet of a ¼ section corner or 100' of a bridge.

Initial: JF

12. Owners of all facilities shall be responsible, at their own expense, for decommissioning of sites. Roads and right-of-way shall be restored to the original condition or better.

Initial: JF

13. All road crossings shall comply with all Department of Transportation and/or Oklahoma Corporation Commission pipeline safety standards rules and regulations in effect at the time of the permit.

Initial: JF

14. All pipelines made of non-metallic materials must have a tracer wire installed so the pipeline can be located from above the ground.

Initial: JF

15. Above ground water lines are temporary and shall be placed within three (3) feet of fence line or county right-of-way as not to disrupt road maintenance. All temporary water lines shall be marked or identified with a company contact number or sign at every county road crossing.

The type of temporary road crossing, either above the road surface or trenched, are at the discretion of the individual commissioner. Trenched lines shall be at sufficient depth as to not interfere with normal maintenance and shall be removed at applicant's expense. The owner, firm or company requesting the permit for temporary or permanent line(s) shall be responsible for all damages to county roads or right-of-way caused by such installation. Temporary installation permits are for a period of thirty (30) days. A new permit will be required for each thirty (30) day time period.

Initial: JF

16. Any pipe or tin horns to be installed shall be a beveled end at a 45° angle with concrete end treatments. The commissioner shall approve proper diameter of pipe.

Initial: JF

**FEE SCHEDULE**  
(Check must accompany permit)

Floodplain Inspection Fee (if necessary).....	\$50.00 each
Floodplain Oil & Gas Pipeline Burial Permit Fee .....	\$300.00 each
Floodplain Permit extension .....	1/2 of permit fee each
(all floodplain permits expire 6 months for original permit date)	
Road Bore – Permanent .....	\$1,000.00 each
Domestic or livestock water 3" diameter or less .....	N/C
Cut or trenched permanent.....	\$1,500.00 each
Temporary lines through culverts/bridges .....	\$1,500.00 each
Temporary buried line, cut or trenched .....	\$1,500.00 each
Temporary Road Crossing Bridge .....	\$1,500.00 each

**NOTE: FAILURE TO NOTIFY COMMISSIONERS OF HEAVY LOAD MOVEMENT OR IF A LINE OR SERVICE ENTRANCE IS PLACED IN COUNTY RIGHT-OF-WAY WITHOUT THE PROPER PERMIT(S) MAY RESULT IN A FINE UP TO \$5,000 PLUS COURT COSTS**

**PETITIONER/CONTRACTOR'S ATTESTMENT**

I hereby attest to the accuracy of the information contained on this application. I further certify that, in my professional opinion, the facility line is installed; the drawings, plans and specifications therefore comply in all respects with the requirement of said permit.

FLOODPLAIN ADMINISTRATOR'S REVIEW

Upon review, I, Tawanna Cathey, a Floodplain Administrator for Pittsburg County, have determined that the above-referenced public service/pipeline crossing permit:

\_\_\_\_\_ Does X Does Not

fall within any floodplain.

Tawanna Cathey  
Signature, Pittsburg County Floodplain Administrator

(Administrator: Please attach a copy of the floodplain permit and receipt where permit was paid if road crossing is within a floodplain)

If granted, this permit is subject to the following conditions, requirements and covenants, to-wit, please initial that you have read each condition, requirement or covenant:

1. Applicant/contractor is aware that all road crossing permits for PITTSBURG COUNTY shall require approval from the Pittsburg County Floodplain Administrator's Office and that all permits and fees owed to the Floodplain Administrator's Office will be paid in full before approval is given by the Board of County Commissioners.

Initial: JF

2. Application for road crossing must be submitted *no later than 5 days before a meeting* of the Board of County Commissioners with a check for the amount of permit made payable to the Pittsburg County Commissioners. The petitioner/contractor shall contact the County Commissioners Office at the completion of crossing for an onsite inspection.

Initial: JF

3. The applicant must agree to hold Pittsburg County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of the facilities on, under, or over the County right-of-way. The petitioner/contractor will be responsible for any damage resulting from deviation of the plat.

Initial: JF

4. All crossings shall be bored on blacktop/asphalt roads. Cutting may be permitted on dirt roads, ditches, or other surfaces with approval from the Board of County Commissioners. Blasting is not permitted.

Initial: JF

5. In construction pipelines or utility routes that cross county highways or roads, NO DITCH, TRENCH, OR BORING, shall be done by the applicant/contractor until approved by the Board of County Commissioners. All ditching and trenching shall be completed to the County Commissioner's specifications. Applicants, contractors or owners shall maintain crossing. (Signs, grass, brush control, etc.)

Initial: JF

6. The petitioner/contractor shall furnish all flag men, lights, barricades, and warning signs meeting all laws and regulations, including those in the "Manual on Uniform Traffic Control Devices" appropriate for the construction project. The petitioner/contractor agrees to keep the road open to traffic unless approved by the Board of County Commissioners. At the conclusion of such work, the right-of-way must be in a presentable condition.

Initial: JF

7. When notified to do so by the Board of County Commissioners, the petitioner/contractor agrees at their expense to make all changes in the facility on County right-of-way.

Initial: JF

8. Relocation – Applicant, upon 30 days written notice, agrees to relocate utilities at their expense should it interfere with County construction and/or maintenance.

Initial: JF

9. Aerial facilities – Clearance above the traffic lanes of the road at all aerial pole line crossings shall comply with applicable safety codes and will not be less than 20 feet. All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times and free from weeds and brush within a 5-foot area of the installation. These facilities, when paralleling the roadway, shall be single pole construction and located within 3 feet of the fence line, if a fence exists. If no fence exists, the right-of-way shall be located by an Oklahoma Registered Land Surveyor at the petitioner's expense and a copy provided to the Board prior to construction. All crossings shall be as nearly perpendicular as possible. Facility shall not interfere with the natural flow of waters or ditch.

Initial: JF

10. Underground facilities – All shall be a minimum of 5 feet below the elevation of the center line of the road, but not less than 4 feet below the bottom of the ditch. Crossings shall be encased from right-of-way line to right-of-way line and be vented off the right-of-way lines. Concrete caps of 4' wide and 6" deep may be required from edge of road to fence line. Identification markers shall be installed at each right-of-way line directly above the facility. The markers must identify the owner's name, address and telephone

number, size of facility, and emergency contact number in black with a yellow background. Marker must be at least 130 sq. inches in area and erected at a height plainly visible from the road right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 4 feet below the ditch flow lines. Conduit placed beneath a roadway must be steel, HDPE, heavy-duty PVC, or fiberglass if it is designed to withstand roadway loading and is properly protected.

Steel pipelines crossing the right-of-way may be, upon approve of the Commissioner, installed without encasement if the carrier pipe material within the right-of-way is superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines crossing the county right-of-way shall be encased. Maintenance will be performed by a method that will not disturb the through lanes or interfere with traffic. All conduits shall be sufficient to withstand roadway loadings.

Initial: JF

11. All section corners and ¼ section corners shall be protected. No pipeline or utility line shall cross an intersection diagonally. No liens shall cross within 50 feet of a ¼ section corner or 100' of a bridge.

Initial: JF

12. Owners of all facilities shall be responsible, at their own expense, for decommissioning of sites. Roads and right-of-way shall be restored to the original condition or better.

Initial: JF

13. All road crossings shall comply with all Department of Transportation and/or Oklahoma Corporation Commission pipeline safety standards rules and regulations in effect at the time of the permit.

Initial: JF

14. All pipelines made of non-metallic materials must have a tracer wire installed so the pipeline can be located from above the ground.

Initial: JF

15. Above ground water lines are temporary and shall be placed within three (3) feet of fence line or county right-of-way as not to disrupt road maintenance. All temporary water lines shall be marked or identified with a company contact number or sign at every county road crossing.

The type of temporary road crossing, either above the road surface or trenched, are at the discretion of the individual commissioner. Trenched lines shall be at sufficient depth as to not interfere with normal maintenance and shall be removed at applicant's expense. The owner, firm or company requesting the permit for temporary or permanent line(s) shall be responsible for all damages to county roads or right-of-way caused by such installation. Temporary installation permits are for a period of thirty (30) days. A new permit will be required for each thirty (30) day time period.

Initial: JF

16. Any pipe or tinorns to be installed shall be a beveled end at a 45° angle with concrete end treatments. The commissioner shall approve proper diameter of pipe.

Initial: JF

**FEE SCHEDULE**  
(Check must accompany permit)

Floodplain Inspection Fee (if necessary).....	\$50.00 each
Floodplain Oil & Gas Pipeline Burial Permit Fee .....	\$300.00 each
Floodplain Permit extension .....	1/2 of permit fee each
(all floodplain permits expire 6 months for original permit date)	
Road Bore – Permanent .....	\$1,000.00 each
Domestic or livestock water 3" diameter or less .....	N/C
Cut or trenched permanent.....	\$1,500.00 each
Temporary lines through culverts/bridges .....	\$1,500.00 each
Temporary buried line, cut or trenched .....	\$1,500.00 each
Temporary Road Crossing Bridge .....	\$1,500.00 each

**NOTE: FAILURE TO NOTIFY COMMISSIONERS OF HEAVY LOAD MOVEMENT OR IF A LINE OR SERVICE ENTRANCE IS PLACED IN COUNTY RIGHT-OF-WAY WITHOUT THE PROPER PERMIT(S) MAY RESULT IN A FINE UP TO \$5,000 PLUS COURT COSTS**

**PETITIONER/CONTRACTOR'S ATTESTMENT**

I hereby attest to the accuracy of the information contained on this application. I further certify that, in my professional opinion, the facility line is installed; the drawings, plans and specifications therefore comply in all respects with the requirement of said permit.

10. Underground facilities - All shall be a minimum of 5 feet below the elevation of the center line of the road, but not less than 4 feet below the bottom of the ditch. Crossings shall be encased from right-of-way line to right-of-way line and be vented off the right-of-way lines. Concrete caps of 4' wide and 6" deep may be required from edge of road to fence line. Identification markers shall be installed at each right-of-way line directly above the facility. The markers must identify the owner's name, address and telephone

number, size of facility, and emergency contact number in black with a yellow background. Marker must be at least 130 sq. inches in area and erected at a height plainly visible from the road right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 4 feet below the ditch flow lines. Conduit placed beneath a roadway must be steel, HDPE, heavy-duty PVC, or fiberglass if it is designed to withstand roadway loading and is properly protected.

Steel pipelines crossing the right-of-way may be, upon approve of the Commissioner, installed without encasement if the carrier pipe material within the right-of-way is superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines crossing the county right-of-way shall be encased. Maintenance will be performed by a method that will not disturb the through lanes or interfere with traffic. All conduits shall be sufficient to withstand roadway loadings.

Initial: JF

11. All section corners and ¼ section corners shall be protected. No pipeline or utility line shall cross an intersection diagonally. No liens shall cross within 50 feet of a ¼ section corner or 100' of a bridge.

Initial: JF

12. Owners of all facilities shall be responsible, at their own expense, for decommissioning of sites. Roads and right-of-way shall be restored to the original condition or better.

Initial: JF

13. All road crossings shall comply with all Department of Transportation and/or Oklahoma Corporation Commission pipeline safety standards rules and regulations in effect at the time of the permit.

Initial: JF

14. All pipelines made of non-metallic materials must have a tracer wire installed so the pipeline can be located from above the ground.

Initial: JF

15. Above ground water lines are temporary and shall be placed within three (3) feet of fence line or county right-of-way as not to disrupt road maintenance. All temporary water lines shall be marked or identified with a company contact number or sign at every county road crossing.

The type of temporary road crossing, either above the road surface or trenched, are at the discretion of the individual commissioner. Trenched lines shall be at sufficient depth as to not interfere with normal maintenance and shall be removed at applicant's expense. The owner, firm or company requesting the permit for temporary or permanent line(s) shall be responsible for all damages to county roads or right-of-way caused by such installation. Temporary installation permits are for a period of thirty (30) days. A new permit will be required for each thirty (30) day time period.

Initial: JF

16. Any pipe or tin horns to be installed shall be a beveled end at a 45° angle with concrete end treatments. The commissioner shall approve proper diameter of pipe.

Initial: JF

**FEE SCHEDULE**  
(Check must accompany permit)

Floodplain Inspection Fee (if necessary).....	\$50.00 each
Floodplain Oil & Gas Pipeline Burial Permit Fee .....	\$300.00 each
Floodplain Permit extension .....	1/2 of permit fee each
(all floodplain permits expire 6 months for original permit date)	
Road Bore – Permanent .....	\$1,000.00 each
Domestic or livestock water 3" diameter or less .....	N/C
Cut or trenched permanent.....	\$1,500.00 each
Temporary lines through culverts/bridges .....	\$1,500.00 each
Temporary buried line, cut or trenched .....	\$1,500.00 each
Temporary Road Crossing Bridge .....	\$1,500.00 each

FLOODPLAIN ADMINISTRATOR'S REVIEW

Upon review, I, Tawanna Cathey, a Floodplain Administrator for Pittsburg County, have determined that the above-referenced public service/pipeline crossing permit:

\_\_\_\_\_ Does  Does Not

fall within any floodplain.

Tawanna Cathey  
 Signature, Pittsburg County Floodplain Administrator

(Administrator: Please attach a copy of the floodplain permit and receipt where permit was paid if road crossing is within a floodplain)

If granted, this permit is subject to the following conditions, requirements and covenants, to-wit, please initial that you have read each condition, requirement or covenant:

1. Applicant/contractor is aware that all road crossing permits for PITTSBURG COUNTY shall require approval from the Pittsburg County Floodplain Administrator's Office and that all permits and fees owed to the Floodplain Administrator's Office will be paid in full before approval is given by the Board of County Commissioners. Initial: JF

2. Application for road crossing must be submitted **no later than 5 days before a meeting** of the Board of County Commissioners with a check for the amount of permit made payable to the Pittsburg County Commissioners. The petitioner/contractor shall contact the County Commissioners Office at the completion of crossing for an onsite inspection. Initial: JF

3. The applicant must agree to hold Pittsburg County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of the facilities on, under, or over the County right-of-way. The petitioner/contractor will be responsible for any damage resulting from deviation of the plat.

Initial: JF

4. All crossings shall be bored on blacktop/asphalt roads. Cutting may be permitted on dirt roads, ditches, or other surfaces with approval from the Board of County Commissioners. Blasting is not permitted.

Initial: JF

5. In construction pipelines or utility routes that cross county highways or roads, NO DITCH, TRENCH, OR BORING, shall be done by the applicant/contractor until approved by the Board of County Commissioners. All ditching and trenching shall be completed to the County Commissioner's specifications. Applicants, contractors or owners shall maintain crossing. (Signs, grass, brush control, etc.)

Initial: JF

6. The petitioner/contractor shall furnish all flag men, lights, barricades, and warning signs meeting all laws and regulations, including those in the "Manual on Uniform Traffic Control Devices" appropriate for the construction project. The petitioner/contractor agrees to keep the road open to traffic unless approved by the Board of County Commissioners. At the conclusion of such work, the right-of-way must be in a presentable condition.

Initial: JF

7. When notified to do so by the Board of County Commissioners, the petitioner/contractor agrees at their expense to make all changes in the facility on County right-of-way.

Initial: JF

8. Relocation - Applicant, upon 30 days written notice, agrees to relocate utilities at their expense should it interfere with County construction and/or maintenance.

Initial: JF

9. Aerial facilities - Clearance above the traffic lanes of the road at all aerial pole line crossings shall comply with applicable safety codes and will not be less than 20 feet. All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times and free from weeds and brush within a 5-foot area of the installation. These facilities, when paralleling the roadway, shall be single pole construction and located within 3 feet of the fence line, if a fence exists. If no fence exists, the right-of-way shall be located by an Oklahoma Registered Land Surveyor at the petitioner's expense and a copy provided to the Board prior to construction. All crossings shall be as nearly perpendicular as possible. Facility shall not interfere with the natural flow of waters or ditch.

Initial: JF

10. Underground facilities - All shall be a minimum of 5 feet below the elevation of the center line of the road, but not less than 4 feet below the bottom of the ditch. Crossings shall be encased from right-of-way line to right-of-way line and be vented off the right-of-way lines. Concrete caps of 4' wide and 6" deep may be required from edge of road to fence line. Identification markers shall be installed at each right-of-way line directly above the facility. The markers must identify the owner's name, address and telephone

number, size of facility, and emergency contact number in black with a yellow background. Marker must be at least 130 sq. inches in area and erected at a height plainly visible from the road right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 4 feet below the ditch flow lines. Conduit placed beneath a roadway must be steel, HDPE, heavy-duty PVC, or fiberglass if it is designed to withstand roadway loading and is properly protected.

Steel pipelines crossing the right-of-way may be, upon approve of the Commissioner, installed without encasement if the carrier pipe material within the right-of-way is superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines crossing the county right-of-way shall be encased. Maintenance will be performed by a method that will not disturb the through lanes or interfere with traffic. All conduits shall be sufficient to withstand roadway loadings.

Initial: JF

11. All section corners and ¼ section corners shall be protected. No pipeline or utility line shall cross an intersection diagonally. No liens shall cross within 50 feet of a ¼ section corner or 100' of a bridge.

Initial: JF

12. Owners of all facilities shall be responsible, at their own expense, for decommissioning of sites. Roads and right-of-way shall be restored to the original condition or better.

Initial: JF

13. All road crossings shall comply with all Department of Transportation and/or Oklahoma Corporation Commission pipeline safety standards rules and regulations in effect at the time of the permit.

Initial: JF

14. All pipelines made of non-metallic materials must have a tracer wire installed so the pipeline can be located from above the ground.

Initial: JF

15. Above ground water lines are temporary and shall be placed within three (3) feet of fence line or county right-of-way as not to disrupt road maintenance. All temporary water lines shall be marked or identified with a company contact number or sign at every county road crossing.

The type of temporary road crossing, either above the road surface or trenched, are at the discretion of the individual commissioner. Trenched lines shall be at sufficient depth as to not interfere with normal maintenance and shall be removed at applicant's expense. The owner, firm or company requesting the permit for temporary or permanent line(s) shall be responsible for all damages to county roads or right-of-way caused by such installation. Temporary installation permits are for a period of thirty (30) days. A new permit will be required for each thirty (30) day time period.

Initial: JF

16. Any pipe or tin horns to be installed shall be a beveled end at a 45° angle with concrete end treatments. The commissioner shall approve proper diameter of pipe.

Initial: JF

**FEE SCHEDULE**
